# UFO Light Material Bucket

**The light material buckets from Ufo are adapted for materials with low bulk density such as snow, wood chips, coal, manure or bedding for animals.**

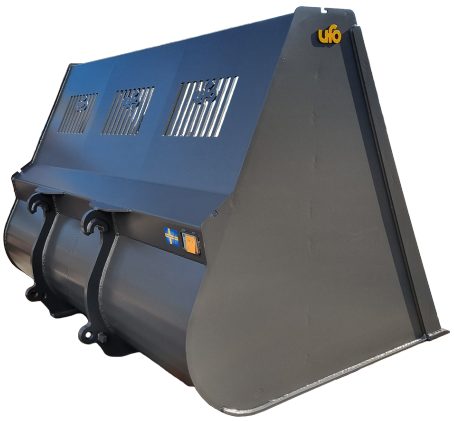
Our Ufo light material buckets have high wear resistance and a geometry that provides optimal performance. Hardox 500 Tuf is used in several areas of the bucket where wear is greatest.

Grilles offer increased visibility, which is favoured by drivers and improves safety.

The light material buckets are available in different sizes from 1.5 to 20 $m^3$.

## Characteristics

- Durable construction. Hardox 500 Tuf is there where wear is always greatest.
- Volume from 1.5 to 20.0 m³
- Galleries for increased visibility in the bucket.
- Optimised for low-density materials such as snow, chips, coal, manure or bedding for animals.



Note! Light material buckets are not suitable for front levelling.
