UFO Container Compactor

Item number: 2001428

The UFO Container compactor is developed for compacting materials, as well as cleaning and sorting containers.

The container compactor, which has been fully developed by Ufo, is an invaluable and unique special tool that saves time and labour at all recycling stations.

The tool is robust, durable, and made from high-quality, hard-wearing steel.

Suitable for wheel loaders between 10 and 30 tonnes.

A valuable compactor

The container compactor is a unique special tool developed by Ufo. It is robust, durable and consists of durable, high-quality steel.

The compactor has three important main functions that save time when working at a recycling station.

Compacts

With the tool, the driver presses and packs the contents of each container so that there is room for more. The compression leads to a higher degree of utilization of each container and fewer transports.

Cleans

Another advantage is that the compactor makes it easier to clean both ground surfaces and flatbeds. The container compactor is therefore equipped with a scraper to scrape off the ground from rubbish and the like that has fallen down.

Maneuvers

Each container compactor also has an articulated hook. The hook allows the moving and positioning of containers to be easily carried out by the machine operator.

Teknisk data

Item no.	Product name	Width (mm)	Height (mm)	Weight, approx. (kg)	Recommended machine weight (tonnes)
2001428	Container compactor	1800	2170	630
