# Götene Deep Bucket Nordic

**Götene Deep Bucket from the Nordic series is intended for regular deep digging in medium-hard material. The deep buckets have teeth or a extended cutting edge.**

The deep excavator buckets have an optimised and slightly conical opening angle for good release during normal digging.

The Nordic series deep buckets are available with a extended edge or teeth. They have a one-piece folded roof and backside to save weight and contribute to better fuel economy.

The buckets are throughout made of Hardox 500 TUF for best durability.

Suitable for excavators between 8 and 22 tonnes.

## Characteristics

- The bucket is entirely constructed from Hardox 500 TUF.
- Extra cut-out sides.
- Backside and roof top in one piece.
- Wear strips are standard.
- Available with extended cutting edge or teeth.

**Note:** Deep buckets in the Nordic series are only available with S-couplers. Specified weights in the product data table may differ depending on the coupler size.
