Götene Trench grading bucket 710-1375 litres

Trench grading bucket from Götene adapted for tiltrotators. TheTrench grading buckets can be used as both trench buckets and grading buckets, making them very flexible for different types of work.

The buckets are made of high-quality steel, including Hardox in the sides and back side, which gives them extra durability and a long service life. The buckets have optimal angles for the best digging and emptying, making the work more efficient.

They come in a variety of sizes and models to suit different excavators and working conditions. With folded corners and wear ribs, the buckets are designed for the best possible performance.

Suitable for excavators between 14 and 25 tons.

Characteristics

- The Trench grading bucket is a V-profile grading bucket for tiltrotators, with the left corner designed as a profiling bucket.
- The bucket must be used together with a tiltrotator and enables rational work when digging and grading the trenches.
- The coupler is angled for best driving characteristics and manouverability.

Other

- Width refers to total width/effective planning width.
- *The volume figure refers to the theoretical volume: in practice, under favourable conditions, the bucket can be overfilled by approximately 25%.
- S-quick coupler is standard, other quick couplers can be offered.

Teknisk data

Item no.	Product name	Volume SAE	Weight, approx. (kg)	Width (mm)	Recommended machine weight (tonnes)
95220	Trench grading bucket TR HD	710*	560	1600/1450	14-18
95223	Trench grading bucket TR HD	790*	615	1700/1550	16-20
95227	Trench grading bucket TR HD	970*	775	1800/1650	18-22
95233	Trench grading bucket TR HD	1250	900	1800/1650	20-25
95235	Trench grading bucket TR HD	1375	1050	2000/1850	20-25
